Freelance Projects

- **PPP Members**

Build the architecture and closely work with team to build an online application in Yii PHP Framework for Pakistan People's Party [www.pppmembers.com]. It is one of the leading Political Party in the Pakistan, where we have launched a countrywide membership drive to reach out to the Workers through online web service. I have participated as a lead role to design the software and database architecture and work closely on application layer security to keep it safe from other unsuspecting activities.

- **Online Ordering System**

I have developed Online Ordering System [www.apexprintshop.com] for the Printing Company located in the *California, USA* as final project of my degree program. The system contains a database of orders, which come across the customers from all over the world. Customers can order for a product right from their home, just login to the system select a product, pay through credit card and your order will be at your door step. The company has their administrator Area, from where they can see the orders and shipped it and then feedback to the customers. This restricted area is control by the System Administrator of the company.

- **Result System (volunteer)**

I have developed an Online Result System [www.abasyn.edu.pk] for Abasyn University, which offers a number of courses. The students can check all the courses provided by the university and made a restricted administration area only for the administration section who only can insert, delete, or update result of the students.
